

## Math Committee 2007-2008

10/22/07

\*\*\*The chair will be Hilda

\*\*\*Tricia will write the meeting notes

In attendance: Hilda, Doris, Marchelle, Stephanie P., Geri, Sandra, Lori, Melanie, and Tricia

The topics discussed and results of the discussion:

We talked about many things, but I didn't have a computer or take notes so I am just going to compile the information we did for the affinity diagram.

After compiling the sticky notes from the affinity diagram we grouped them into 3 different categories.

Growth:

\*get 2007 test results for all subgroups

\*how much growth did SWD make in math even though they were not a subgroup in 2007

\*what are the 2007 stats?

\*what is the AYP growth for 2007 that was already set by the state?

Strategies:

\*participation in math workshop for staff development and using strategies in the regular classroom

\*PLC with each grade level talking to one another through the committee processes.

\*strengthen your thinking assessment (through AG department)

Processes to change on former plan: (so far)

\*Drop #2 in the second key process

\*#4 in the 1<sup>st</sup> key process needs to be reworded with per grade level for PLC's (not among staff), but open the invitation to attended to all

\*Take out the word "subgroup" in overall school goal for math

\*Drop the word bi-weekly on #2 in the 1<sup>st</sup> key process
